

Amendments to the Specification:

Please replace paragraph [0072] with the following amended paragraph:

[0072] In an alternative implementation, caching of the video signals 502 may occur at the video-enabled device where the video signals 502 originated. Thus, with reference to the example shown in FIG. 5, the STB 102 may cache the video signals 502 within its own internal storage device 310 (depicted in FIG. 3). In another alternative implementation, caching of the video signals 502 may occur at the non-video-enabled device.
